Driftwood Log Set
Installation Addendum
DRIFTWOOD-5 (245)

The custom log set comes in a variety of sizes and may be used on a variety of different Galaxy Series and custom fireplace designs including: Single-sided, See-through, Corner, Pier, Bay and Four-sided fireplaces.

For that reason, we have taken the photographs of the step-by-step log installation out of the firebox itself and on a table top so we could get front, top and opposite angles of each log being installed. You will be able to better see the placement of the logs on the burner for whichever design you are working with.
PRIOR TO LOG INSTALLATION:

HOW TO IDENTIFY THE LOGS:

Each log has a round identification with its number embossed in it. Above, you can see the number '01' embossed in the middle of the circle. This is Log #1.
